Department of the Air Force (Military Functions) 143

INTRODUCTION

INTRODUCTION

BACKGROUND

Between 1955 and 1982, the Department of Defense (DoD) published on a biennial basis, the Map Book of Major Military Installations. This publication was intended to provide DoD managers a convenient reference for identification of major military installations in the United States. Prior to each issuance, the last of which was in June 1982, the Military Departments provided input concerning the installations to be included.

In the late 1970's, it was suggested by officials within the Office of the Secretary of Defense that the information in the Map Book of Major Military Installations be combined with other DoD geographical information in order to satisfy several requirements in one, easily accessible publication. In 1981, a prototype was developed for comment. From the comments received, a format was developed for the statistical abstract table for each state which is included in this report. This publication is devoted entirely to information on DoD personnel, payroll outlays, and prime contracts over $25,000.

Information in this statistical abstract table is for the most part provided according to Military Department with a total for "Other Defense Activities." Personnel information includes active duty military, direct hire civilian, and Reserve and National Guard personnel. Payroll outlays and prime contract awards over $25,000 are combined to provide an indication of total expenditures for each state. These data are also broken down by type of payroll and category of contract, respectively. In addition, the following information is provided for each state: (1) ten locations where the largest expenditures are made and the most personnel are located; (2) total prime contract awards over $25,000 for the past three fiscal years; and (3) the top five contractors, their total awards, major area of work, and dollar value associated with the major area of work.

NOTES ON COVERAGE

Personnel. Personnel data include total active duty military, direct hire civilian, and Reserve and National Guard personnel as of September 30, 1985. The active duty military personnel include those based ashore and exclude those who are temporarily shore-based or afloat. In addition, active duty military personnel in each Department include a number of personnel in a transient status. The Marine Corps and Air Force report these personnel at their last assigned location prior to their arrival at their new permanent duty location. The Army and Navy include these personnel in one category entitled "Undistributed" which may also include personnel for which an exact location is undetermined. As of September 30, 1985, there were 25,754 personnel reported in this category who could not be distributed by state.

In some instances, the Military Departments report personnel by parent installation rather than their operating location. Such variations tend to occur in metropolitan areas where military activities are scattered among political jurisdictions. In addition, some personnel on temporary duty as of September 30, 1985, may be reported at their assigned locations.

Excluded from the direct hire civilian personnel are those not subject to Office of Management and Budget (OMB) ceiling controls. As of September 30, 1985, the Department of Defense employed 11,260 nonceiling personnel in the United States and its territories.

Department of the Army civilian personnel include employees involved in civil functions in the United States. This consists of 29,866 employees of the Army Corps of Engineers and 129 Army cemeterial employees. Also included in this report are three persons performing civil functions in the Air Force. The Title 5 National Guard technicians are excluded from the Air Force civilian strength figures as are personnel with classified missions.

The Reserve and National Guard personnel figures include only the Ready Reserve, which consists of the Selected Reserve, the Individual Ready Reserve and the Inactive National Guard. These personnel are distributed by state according to their home of residence. Coast Guard Reserve are excluded.

Payroll Outlays. Information provided for payroll outlays must be termed estimated because much of it includes calculated and prorated data. Although the data are based on actual payroll information, in many instances actual outlays have been prorated to the installation or the location of interest.

Payroll outlays comprise gross earnings of personnel which, except for retired military personnel compensation, include gross compensation for personnel services rendered the government and cash allowances for personnel benefits. Excluded from gross earnings for employees is the employer's share of employee benefits.

The user of estimated payroll outlays information should also be aware of problems involved with the location of reported payrolls. Reporting of payroll outlays by the location of the finance office issuing the checks can occur. This could mean that military and civilian pay for the same installation may be reported at different locations if paid by different finance offices.

Finally, payroll outlays for military personnel who are temporarily shore-based or afloat are reported at the personnel's home port.

Prime Contracts. Data provided for each state reflect the net value of debit and credit procurement actions over $25,000. Prime contract awards of $25,000 or less are not included in this report since records pertaining to the locations of performance are not maintained. If a total for a procurement category for a state was a net deficit, the value is indicated in parentheses.

It is possible that the amount of prime contract dollars for a major area of work will exceed the total amount for a given prime contractor. This occurs when a contract is terminated with the remaining amount deducted from the total amount for the prime contractor. This is especially evident when all or most of a contractor's work is in a single major area of work.

In regard to the locations reported for contracts, contract work is not necessarily performed at the location where the contract was awarded. Most manufacturing contracts have been attributed to the contractor's location where the product will be processed and assembled. When contract work will be performed at more than one plant, the contract has been attributed to the location where the largest dollar amount of work will be performed. Both construction and service contracts have been attributed to the state where the work is to be performed. Contracts for transportation and communications services have been attributed to the state where the contractor's home office is located. For purchases from wholesale or other distribution firms, the location is the contractor's business address.

All prime contract data for Guam are reported against one location; therefore, no breakout of expenditures for prime contracts by location within Guam is provided.

DATA RELATING TO CONTRACTORS IN THIS PUBLICATION ARE SUBJECT TO THE ACCURACY OF THE DUN & BRADSTREET CORPORATION'S DATA UNIVERSAL NUMBERING SYSTEM AND ITS ABILITY TO DESCRIBE RELATIONSHIPS OF CONTRACTORS.
